Curriculum

If you would like more information about any of the subjects, please click on the subject code to bring you to the academic catalog.

Foundation Subjects*

MBA500 - Building Business Leaders

MBA504 - Applied Business Statistics

*To best prepare you for academic success at the graduate level, an undergraduate background is required in certain subjects. Upon submitting all of your admission documents, they are reviewed to determine if this requirement is met. If this requirement is not met, students are required to take up to 2 additional Foundational Courses to meet this requirement. Students pursuing a concentration are awarded university credit hours for these foundational courses but those awarded credit hours do not go towards the 30 credit hours required by the program curriculum.

Major Subjects (21 Total Credits)

MBA530 - Leading People and Organizations: Impactful leaders have the ability to define direction, understand their uniqueness, communicate effectively and use emotional intelligence to lead people, teams, and organizations. Students will explore leadership theories, issues, and trends, while also applying evidence-based methodologies and tools to assess and elevate their personal leadership plan. By connecting leadership theories and methodologies to trends, challenges, and opportunities facing leadership, this course will help students to effectively lead and empower others.

MBA540 - Organizational Strategy in a Global Environment: Impactful leaders leverage business intelligence to make ethical decisions, solve complex problems, and craft strategic direction to improve organizational performance and agility in a dynamic global business environment. Students develop context and understanding of how organizations formulate a strategic direction and organize all business functions to complement each other to achieve organizational objectives. Students develop the strategy know-how to assess, inform and form interconnected functional and organizational strategic direction.

MBA580 - Innovation and Strategy for High-Performance Organizations: High performance organizational leaders cultivate innovative thinking and processes and their application to developing successful business strategies. Students will analyze the attributes of innovative thinkers and cultures and how organizational structure and policy can promote or inhibit innovation. The course will explore the market and technology forces that drive the adoption of innovation and the tools and methods--such as risk analysis, economic analysis, statistics, and forecasting--to drive the analysis, selection and implementation of innovative products and processes.

MBA620 - Measuring Success in an Organization: Effective leaders need a comprehensive understanding of financial and management accounting principles, analytical techniques and computer-based tools. Students will prepare, monitor, and evaluate financial and accounting reports and metrics and present their findings and recommendations. From reporting to planning, students will develop an acute awareness of a perpetually changing business environment and how entities measure its success, challenges and resources.

Apply Now

MBA645 - Optimizing Brands: Organizational leaders balance brand management and its relationship with impactful marketing strategies. Students will study the key brand elements of identity, trust, and building habit-forming brand experiences. By applying market research, target market identification, customer trends in the marketplace, and ethical considerations, students will develop a marketing strategy for an organization.

MBA687 - Leading Organizational Change: Leadership requires the understanding of human intelligence and how individuals function within an organization to achieve winning results. In this course, students will explore how to develop a workforce to actualize business goals and objectives and study how to manage organizational change through communication strategies that reduce risk, address employee dissatisfaction and apprehension, and increase strategic alignment among leaders, managers and employees. This course will emphasize the blending of financial and human capital resources to effectively complete organizational change and proffer solutions that are strategic and balanced.

MBA699 - Strategic Opportunity Management: Impactful leaders move strategic initiatives forward with innovation, collaboration and informed, data-driven decisionmaking. In this course, students will assess conditions, processes, and resources that impact how leaders design adaptive strategies, using emotional and business intelligence to manage strategic objectives. Student learners will solve complex problems, manage opportunities and build sustainable stakeholder relationships.

Apply Now

Major Electives (9 Total Credits)

IT510 - Advanced Information Technology: This course focuses on the principles and practices underlying the analysis, design, implementation and management of information technology systems. Topics include information system development methodologies, systems planning, requirements analysis, systems implementation, software engineering, project management, and interface, database and process design.

IT550 - Management of Information Technology: This course is a detailed introduction to the major issues underlying the successful management of information technology in contemporary organizations. The course covers three major areas: (1) The interrelations between organizational structure and process, and the adoption of new information systems technologies; (2) The actual management of the IT function within the organization; and (3) IT project management which focuses on the operational steps in designing and carrying out specific IT projects. This course will utilize case studies as an introduction to real-world IT management best practices and strategies, and to guide students to understanding the impact of emerging technologies in business contexts.

IT657 - Enterprise Resource Planning: This course combines the practice of business management with information technology at the point where technology integrates with fundamental business skills that support business objectives. Students will examine business management best practices and enterprise systems in organizations that support business functions. Emphasis will be placed on how information technology can support and enable integration of technology and business process re-engineering.

Total Credit Hours: 30 credits (or 10 Subjects)

Meet Our Faculty Members

SNHU is dedicated to student success, and that starts with bringing expert faculty to teach our specialized subjects for students studying online from India. In addition to real-world experience in their field and a passion for education, each faculty member undergoes training for online instruction from SNHU.

Our faculty members for online degrees in India are Indian, meaning they can help bridge the cultural gap and give you the unique perspective of an Indian professional working domestically and globally. SNHU hires our Indian faculty members at the same standard as our on campus faculty, so you'll get the unique opportunity to learn from local experts hired at U.S. university standards.

Faculty Highlight

Dr. Meera Iyer, PhD

12+ years of experience

Teaches Physiological Psychology

Dr. Iyer is a child and adolescent psychologist with a PhD in psychology, specializing in cyberpsychology.

She is a member of prominent international and national psychological associations (APA, INSPA, NAOP and BCPA) and has made contributions to government-based initiatives (NCPCR, Mission Shakti-Gov. of India) for counseling trauma and domestic abuse victims.
